

Human VIP (Vasoactive Intestinal Peptide) ELISA Kit | VIP elisa kit

Human VIP (Vasoactive Intestinal Peptide) ELISA Kit

CATALOG #
AAA270131

REACTIVITY
Human

PRODUCT SYNONYMS

VIP (Vasoactive Intestinal Peptide); Human VIP (Vasoactive Intestinal Peptide) ELISA Kit; PHM27; Intestinal peptide PHV-42; Peptide histidine valine 42; Peptide histidine methioninamide 27; VIP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	7.82-500 pg/mL
Sensitivity	2.63 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for VIP elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Vasoactive Intestinal Peptide(VIP). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Vasoactive Intestinal Peptide(VIP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Vasoactive Intestinal Peptide(VIP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm±10nm. The concentration of Vasoactive Intestinal Peptide(VIP) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for VIP elisa kit
