

## Mouse KLK3 (Kallikrein 3) ELISA Kit | KLK3 elisa kit

Mouse KLK3 (Kallikrein 3) ELISA Kit

CATALOG #  
**AAA270152**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

KLK3 (Kallikrein 3); Mouse KLK3 (Kallikrein 3) ELISA Kit; APS; KLK2A1; PSA; HK3; KLKB1; Semin; Prostate Specific Antigen; Kallikrein-Related Peptidase 3; Semenogelase; g-Seminoprotein; P-30 Antigen; Plasma kallikrein; KLK3 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Mouse                                                            |
| Samples                 | Serum, plasma, tissue homogenates and other biological fluids    |
| Assay Type              | Sandwich                                                         |
| Detection Range         | 15.63-1000 pg/mL                                                 |
| Sensitivity             | 6.1 pg/mL                                                        |
| Intra-assay Precision   | CV%<8%                                                           |
| Inter-assay Precision   | CV%<10%                                                          |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt. |

### ADDITIONAL INFORMATION

#### Related Product Information for KLK3 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Kallikrein 3(KLK3). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Kallikrein 3(KLK3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Kallikrein 3(KLK3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Kallikrein 3(KLK3) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for KLK3 elisa kit
