

## Mouse HSP40 (Heat Shock Protein 40) ELISA Kit | HSP40 elisa kit

Mouse HSP40 (Heat Shock Protein 40) ELISA Kit

CATALOG #  
**AAA270164**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

HSP40 (Heat Shock Protein 40); Mouse HSP40 (Heat Shock Protein 40) ELISA Kit; DnaJ; DNAJB1; Sis1; RSPH16B; HSPF1; DnaJ homolog subfamily B member 1; Radial Spoke 16 Homolog B; Heat Shock 40kDa Protein 1; DnaJ protein homolog 1; HSP40 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Mouse                                                            |
| Samples                 | Tissue homogenates, cell lysates and other biological fluids.    |
| Assay Type              | Sandwich                                                         |
| Detection Range         | 0.63-40 ng/mL                                                    |
| Sensitivity             | 0.245 ng/mL                                                      |
| Intra-assay Precision   | CV%<8%                                                           |
| Inter-assay Precision   | CV%<10%                                                          |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt. |

### ADDITIONAL INFORMATION

#### Related Product Information for HSP40 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Heat Shock Protein 40(HSP40). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Heat Shock Protein 40(HSP40). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Heat Shock Protein 40(HSP40), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Heat Shock Protein 40(HSP40) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for HSP40 elisa kit

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
