

Mouse HEXb (Hexosaminidase B Beta) ELISA Kit | HEXb elisa kit

Mouse HEXb (Hexosaminidase B Beta) ELISA Kit

CATALOG #
AAA270336

REACTIVITY
Mouse

PRODUCT SYNONYMS

HEXb (Hexosaminidase B Beta); Mouse HEXb (Hexosaminidase B Beta) ELISA Kit; Hex-B; ENC-1AS; HCC-7; Beta-N-acetylhexosaminidase subunit beta; Cervical cancer proto-oncogene 7 protein; N-acetyl-beta-glucosaminidase subunit beta; HEXb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, tissue homogenates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.063 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for HEXb elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hexosaminidase B Beta (HEXb). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Hexosaminidase B Beta (HEXb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hexosaminidase B Beta (HEXb), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Hexosaminidase B Beta (HEXb) in the samples is then determined by comparing the OD of the samples to the standard curve.
