

Human LMWK (Low Molecular Weight Kininogen) ELISA Kit | LMWK elisa kit

Human LMWK (Low Molecular Weight Kininogen) ELISA Kit

CATALOG #
AAA270401

REACTIVITY
Human

PRODUCT SYNONYMS

LMWK (Low Molecular Weight Kininogen); Human LMWK (Low Molecular Weight Kininogen) ELISA Kit; Low Molecular Weight Kininogen; LMWK elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Plasma.
Assay Type	Sandwich
Detection Range	6.25-400 ng/mL
Sensitivity	2.93 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for LMWK elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Low Molecular Weight Kininogen(LMWK). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Low Molecular Weight Kininogen(LMWK). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Low Molecular Weight Kininogen(LMWK), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Low Molecular Weight Kininogen(LMWK) in the samples is then determined by comparing the OD of the samples to the standard curve.
