

Mouse NRG1 (Neuregulin 1) ELISA Kit | NRG1 elisa kit

Mouse NRG1 (Neuregulin 1) ELISA Kit

CATALOG #
AAA271112

REACTIVITY
Mouse

PRODUCT SYNONYMS

NRG1 (Neuregulin 1); Mouse NRG1 (Neuregulin 1) ELISA Kit; ARIA; GGF; HGL; HRG; HRGA; NDF; SMDF; Acetylcholine receptor-inducing activity; Glial growth factor; Heregulin; Neu differentiation factor; Sensory and motor neuron-derived factor; NRG1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	15.63-1000 pg/mL
Sensitivity	6.2 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for NRG1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Neuregulin 1(NRG1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Neuregulin 1(NRG1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Neuregulin 1(NRG1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Neuregulin 1(NRG1) in the samples is then determined by comparing the OD of the samples to the standard curve.
