

Human PDGFRa (Platelet Derived Growth Factor Receptor Alpha) ELISA Kit | PDGFRa elisa kit

Human PDGFRa (Platelet Derived Growth Factor Receptor Alpha) ELISA Kit

CATALOG #
AAA271177

REACTIVITY
Human

PRODUCT SYNONYMS

PDGFRa (Platelet Derived Growth Factor Receptor Alpha); Human PDGFRa (Platelet Derived Growth Factor Receptor Alpha) ELISA Kit; CD140a; PDGFR2; Rhe-PDGFRa; CD140 antigen-like family member A; Platelet-derived growth factor receptor 2; Alpha-type platelet-derived growth factor receptor; PDGFRa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Tissue homogenates, cell lysates and other biological fluids
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.064 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for PDGFRa elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Platelet Derived Growth Factor Receptor Alpha(PDGFRa). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Platelet Derived Growth Factor Receptor Alpha(PDGFRa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Platelet Derived Growth Factor Receptor Alpha(PDGFRa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Platelet Derived Growth Factor Receptor Alpha(PDGFRa) in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
