

## Human COL6 (Collagen Type VI) ELISA Kit | COL6 elisa kit

Human COL6 (Collagen Type VI) ELISA Kit

CATALOG #  
**AAA271349**

REACTIVITY  
**Human**

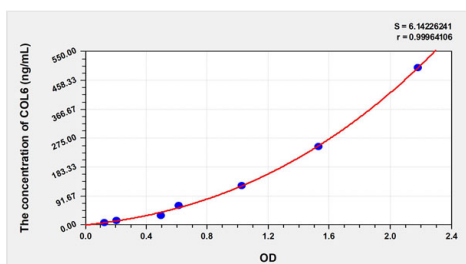

### PRODUCT SYNONYMS

COL6 (Collagen Type VI); Human COL6 (Collagen Type VI) ELISA Kit; collagen 6; OPLL ; PP3610; COL6 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Human                                                            |
| Samples                 | serum, plasma, tissue homogenates and other biological fluids    |
| Assay Type              | Sandwich                                                         |
| Detection Range         | 7.82-500 ng/mL                                                   |
| Sensitivity             | 2.8 ng/mL                                                        |
| Intra-assay Precision   | CV%<8%                                                           |
| Inter-assay Precision   | CV%<10%                                                          |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt. |

### ADDITIONAL INFORMATION

#### Related Product Information for COL6 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Collagen Type VI(COL6). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Collagen Type VI(COL6). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Collagen Type VI(COL6), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Collagen Type VI(COL6) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for COL6 elisa kit
