

Human TPH1 (Tryptophan Hydroxylase 1) ELISA Kit | TPH1 elisa kit

Human TPH1 (Tryptophan Hydroxylase 1) ELISA Kit

CATALOG #
AAA272425

REACTIVITY
Human

PRODUCT SYNONYMS

TPH1 (Tryptophan Hydroxylase 1); Human TPH1 (Tryptophan Hydroxylase 1) ELISA Kit; TPH; TPRH; TRPH; Tryptophan 5-Monooxygenase; TPH1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human TPH1. No significant cross-reactivity or interference between Human TPH1 and analogues was observed.
Assay Type	Sandwich
Detection Range	3.13-200 ng/mL
Sensitivity	1.31 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for TPH1 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Tryptophan Hydroxylase 1(TPH1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Tryptophan Hydroxylase 1(TPH1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Tryptophan Hydroxylase 1(TPH1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Tryptophan Hydroxylase 1(TPH1) in the samples is then determined by comparing the OD of the samples to the standard curve.
