

Human TAP (Trypsinogen Activation Peptide) ELISA Kit | TAP elisa kit

Human TAP (Trypsinogen Activation Peptide) ELISA Kit

CATALOG #
AAA273227

REACTIVITY
Human

PRODUCT SYNONYMS

TAP (Trypsinogen Activation Peptide); Human TAP (Trypsinogen Activation Peptide) ELISA Kit; Trypsinogen Activation Peptide; TAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human TAP. No significant cross-reactivity or interference between Human TAP and analogues was observed.
Assay Type	Competitive
Detection Range	156.25-10000 pg/mL
Sensitivity	54.1 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for TAP elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Trypsinogen Activation Peptide(TAP) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Trypsinogen Activation Peptide(TAP). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Trypsinogen Activation Peptide(TAP) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for TAP elisa kit

Infection immunity; Immune molecule; Hepatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
