

Mouse HTT (Huntingtin) ELISA Kit | HTT elisa kit

Mouse HTT (Huntingtin) ELISA Kit

CATALOG #
AAA274260

REACTIVITY
Mouse

PRODUCT SYNONYMS

HTT (Huntingtin); Mouse HTT (Huntingtin) ELISA Kit; IT15; HD; Interesting Transcript 15; Huntington disease protein; HTT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse HTT. No significant cross-reactivity or interference between Mouse HTT and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.059 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for HTT elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Huntingtin(HTT). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Huntingtin(HTT). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Huntingtin(HTT), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Huntingtin(HTT) in the samples is then determined by comparing the OD of the samples to the standard curve.
