

## Mouse LXRa (Liver X Receptor Alpha) ELISA Kit | LXRa elisa kit

Mouse LXRa (Liver X Receptor Alpha) ELISA Kit

CATALOG #  
**AAA274586**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

LXRa (Liver X Receptor Alpha); Mouse LXRa (Liver X Receptor Alpha) ELISA Kit; NR1-H3; LXR-A; LXRA; RLD-1; Nuclear Receptor Subfamily 1; Group H; Member 3; Oxysterols receptor LXR-alpha; LXRa elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Mouse LXRa. No significant cross-reactivity or interference between Mouse LXRa and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                              |
| Detection Range         | 0.32-20 ng/mL                                                                                                                                                                         |
| Sensitivity             | 0.103 ng/mL                                                                                                                                                                           |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

ADDITIONAL INFORMATION

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for LXRA elisa kit | Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Liver X Receptor Alpha(LXRa). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Liver X Receptor Alpha(LXRa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Liver X Receptor Alpha(LXRa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Liver X Receptor Alpha(LXRa) in the samples is then determined by comparing the OD of the samples to the standard curve. |
| Product Categories/Family for LXRA elisa kit   | Signal transduction; Metabolic pathway; Infection immunity; Hepatology                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
