

## Mouse GLRX (Glutaredoxin) ELISA Kit | GLRX elisa kit

Mouse GLRX (Glutaredoxin) ELISA Kit

CATALOG #  
**AAA275052**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

GLRX (Glutaredoxin); Mouse GLRX (Glutaredoxin) ELISA Kit; GRX; GRX1; Thioltransferase; GLRX elisa kit

| Reactivity              | Mouse                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Mouse GLRX. No significant cross-reactivity or interference between Mouse GLRX and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                              |
| Detection Range         | 78.13-5000 pg/mL                                                                                                                                                                      |
| Sensitivity             | 35 pg/mL                                                                                                                                                                              |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

### ADDITIONAL INFORMATION

#### Related Product Information for GLRX elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Glutaredoxin(GLRX). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Glutaredoxin(GLRX). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Glutaredoxin(GLRX), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Glutaredoxin(GLRX) in the samples is then determined by comparing the OD of the samples to the standard curve.
