

## Rat METRN (Meteorin) ELISA Kit | METRN elisa kit

Rat METRN (Meteorin) ELISA Kit

CATALOG #  
**AAA275226**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

METRN (Meteorin); Rat METRN (Meteorin) ELISA Kit; C16orf23; RJD6; Glial Cell Differentiation Regulator; METRN elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Rat METRN. No significant cross-reactivity or interference between Rat METRN and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                            |
| Detection Range         | 0.16-10 ng/mL                                                                                                                                                                       |
| Sensitivity             | 0.054 ng/mL                                                                                                                                                                         |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.              |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.               |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                    |

### ADDITIONAL INFORMATION

#### Related Product Information for METRN elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Meteorin(METRN). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Meteorin(METRN). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Meteorin(METRN), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Meteorin(METRN) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for METRN elisa kit

Neuro science

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
