

General DHEA (Dehydroepiandrosterone) ELISA Kit | DHEA elisa kit

General DHEA (Dehydroepiandrosterone) ELISA Kit

CATALOG #
AAA275619

REACTIVITY
General

PRODUCT SYNONYMS

DHEA (Dehydroepiandrosterone); General DHEA (Dehydroepiandrosterone) ELISA Kit; DHEA; DHEA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General DHEA. No significant cross-reactivity or interference between General DHEA and analogues was observed.
Assay Type	Competitive
Detection Range	156.25-10000 pg/mL
Sensitivity	256 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for DHEA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Dehydroepiandrosterone(DHEA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Dehydroepiandrosterone(DHEA). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Dehydroepiandrosterone(DHEA) in the samples is then determined by comparing the OD of the samples to the standard curve.
