

## Simian IFNb (Interferon Beta) ELISA Kit | IFNb elisa kit

Simian IFNb (Interferon Beta) ELISA Kit

CATALOG #  
**AAA275691**

REACTIVITY  
**Simian**

### PRODUCT SYNONYMS

IFNb (Interferon Beta); Simian IFNb (Interferon Beta) ELISA Kit; IFNB1; IFN-B; IFB; IFF; IFNB; Interferon Beta 1 Fibroblast; IFN Beta; IFNb elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Simian                                                                                                                                                                                  |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Simian IFNb. No significant cross-reactivity or interference between Simian IFNb and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                                |
| Detection Range         | 15.63-1000 pg/mL                                                                                                                                                                        |
| Sensitivity             | 5.9 pg/mL                                                                                                                                                                               |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                  |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for IFNb elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Interferon Beta(IFNb). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Interferon Beta(IFNb). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Interferon Beta(IFNb), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Interferon Beta(IFNb) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for IFNb elisa kit

Cytokine; Tumor immunity; Infection immunity

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
