

General PAF (Platelet Activating Factor) ELISA Kit | PAF elisa kit

General PAF (Platelet Activating Factor) ELISA Kit

CATALOG #
AAA275839

REACTIVITY
General

PRODUCT SYNONYMS

PAF (Platelet Activating Factor); General PAF (Platelet Activating Factor) ELISA Kit; PAF-Acether; AGEPC; Acetyl-Glycerol-Ether-Phosphorylcholine; PAF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General PAF. No significant cross-reactivity or interference between General PAF and analogues was observed.
Assay Type	Competitive
Detection Range	46.88-3000 pg/mL
Sensitivity	14.4 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for PAF elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Platelet Activating Factor(PAF) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Platelet Activating Factor(PAF). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Platelet Activating Factor(PAF) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for PAF elisa kit

Metabolic pathway; Infection immunity; Cardiovascular biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
