

## Rat Gly (Glycine) ELISA Kit | Gly elisa kit

Rat Gly (Glycine) ELISA Kit

CATALOG #  
AAA276421

REACTIVITY  
Rat

### PRODUCT SYNONYMS

Gly (Glycine); Rat Gly (Glycine) ELISA Kit; Glycine; Gly elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                 |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                                             |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Rat Gly. No significant cross-reactivity or interference between Rat Gly and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                     |
| Detection Range         | 1.57-100 ug/mL                                                                                                                                                                  |
| Sensitivity             | 0.55 ug/mL                                                                                                                                                                      |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.          |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.           |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                |

### ADDITIONAL INFORMATION

#### Related Product Information for Gly elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Glycine(Gly) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Glycine(Gly). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Glycine(Gly) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for Gly elisa kit

Microbiology and biochemistry

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
