

## Chicken NE (Noradrenaline) ELISA Kit | NE elisa kit

Chicken NE (Noradrenaline) ELISA Kit

CATALOG #  
**AAA276494**

REACTIVITY  
**Chicken**

### PRODUCT SYNONYMS

NE (Noradrenaline); Chicken NE (Noradrenaline) ELISA Kit; NA; NAd; Norepinephrine; Norepi; NE elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Chicken                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Chicken NE. No significant cross-reactivity or interference between Chicken NE and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                           |
| Detection Range         | 78.13-5000 pg/mL                                                                                                                                                                      |
| Sensitivity             | 26.1 pg/mL                                                                                                                                                                            |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

### ADDITIONAL INFORMATION

#### Related Product Information for NE elisa kit

**Principle of the Assay:** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Noradrenaline(NE) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Noradrenaline(NE). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Noradrenaline(NE) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for NE elisa kit

Signal transduction; Infection immunity; Neuro science; Hormone metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
