

Human IFA (Intrinsic Factor Antibody) ELISA Kit | IFA elisa kit

Human IFA (Intrinsic Factor Antibody) ELISA Kit

CATALOG #
AAA277005

REACTIVITY
Human

PRODUCT SYNONYMS

IFA (Intrinsic Factor Antibody); Human IFA (Intrinsic Factor Antibody) ELISA Kit; Gastric Intrinsic Factor; Gastric intrinsic factor (vitamin B synthesis); GIF; TCN3; TCM3; IFA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human IFA. No significant cross-reactivity or interference between Human IFA and analogues was observed.
Assay Type	Sandwich
Detection Range	78.13-5000 pg/mL
Sensitivity	29 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for IFA elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to IFA(Intrinsic Factor Antibody). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to IFA(Intrinsic Factor Antibody). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain IFA(Intrinsic Factor Antibody), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of IFA(Intrinsic Factor Antibody) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for IFA elisa kit

Signal transduction; Metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
