

## Chicken TSH (Thyroid Stimulating Hormone) ELISA Kit | TSH elisa kit

Chicken TSH (Thyroid Stimulating Hormone) ELISA Kit

CATALOG #  
**AAA277024**

REACTIVITY  
**Chicken**

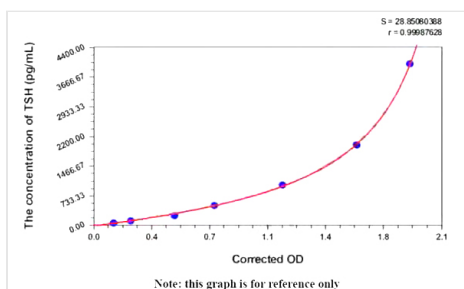

### PRODUCT SYNONYMS

TSH (Thyroid Stimulating Hormone); Chicken TSH (Thyroid Stimulating Hormone) ELISA Kit; Thyrotropin; TSH elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                         |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Chicken                                                                                                                                                                                 |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Chicken TSH. No significant cross-reactivity or interference between Chicken TSH and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                                |
| Detection Range       | 62.5-4000 pg/mL                                                                                                                                                                         |
| Sensitivity           | 19.2 pg/mL                                                                                                                                                                              |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.                  |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |

### ADDITIONAL INFORMATION

#### Related Product Information for TSH elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chicken TSH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Chicken TSH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chicken TSH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Chicken TSH in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for TSH elisa kit

Endocrinology; Hormone metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
