

Rabbit double stranded DNA (dsDNA) ELISA Kit | dsDNA elisa kit

Rabbit anti-double stranded DNA (dsDNA) ELISA KIT

CATALOG #
AAA277036

REACTIVITY
Rabbit

PRODUCT SYNONYMS

double stranded DNA (dsDNA); Rabbit anti-double stranded DNA (dsDNA) ELISA KIT; dsDNA; dsDNA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of Rabbit dsDNA. No significant cross-reactivity or interference between Rabbit dsDNA and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.098ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for dsDNA elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to double stranded DNA(dsDNA). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to double stranded DNA(dsDNA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain double stranded DNA(dsDNA), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of double stranded DNA(dsDNA) in the samples is then determined by comparing the OD of the samples to the standard curve.
