

Rat AD (Adropin) ELISA Kit | AD elisa kit

Rat AD (Adropin) ELISA Kit

CATALOG #
AAA277038

REACTIVITY
Rat

PRODUCT SYNONYMS

AD (Adropin); Rat AD (Adropin) ELISA Kit; ENHO; UNQ470; Energy Homeostasis Associated Protein; AD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Rat AD. No significant cross-reactivity or interference between Rat AD and analogues was observed.
Assay Type	Sandwich
Detection Range	31.25-2000 pg/mL
Sensitivity	12.3 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for AD elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Adropin(AD). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Adropin(AD). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Adropin(AD), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Adropin(AD) in the samples is then determined by comparing the OD of the samples to the standard curve.
