

General SIP (Sphingosine 1 Phosphate) ELISA Kit | SIP elisa kit

General SIP (Sphingosine 1 Phosphate) ELISA Kit

CATALOG #
AAA277103

REACTIVITY
General

PRODUCT SYNONYMS

SIP (Sphingosine 1 Phosphate); General SIP (Sphingosine 1 Phosphate) ELISA Kit; EDG3; LPB3; S1P3; S1PR3; endothelial differentiation; sphingolipid G-protein-coupled receptor; 3; Sphingosine 1-phosphate receptor Edg-3; SIP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General SIP. No significant cross-reactivity or interference between General SIP and analogues was observed.
Assay Type	Competitive
Detection Range	3.13-200 ng/mL
Sensitivity	0.91 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8% Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10% Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for SIP elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Sphingosine 1 Phosphate(SIP) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Sphingosine 1 Phosphate(SIP). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Sphingosine 1 Phosphate(SIP) in the samples is then determined by comparing the OD of the samples to the standard curve.
