

Rabbit COL1 (Collagen Type I) ELISA Kit | COL1 elisa kit

Rabbit COL1 (Collagen Type I) ELISA Kit

CATALOG #
AAA277160

REACTIVITY
Rabbit

PRODUCT SYNONYMS

COL1 (Collagen Type I); Rabbit COL1 (Collagen Type I) ELISA Kit; COL1; COLI; COL1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of Rabbit COL1. No significant cross-reactivity or interference between Rabbit COL1 and analogues was observed.
Assay Type	Sandwich
Detection Range	0.63-40 ng/mL
Sensitivity	0.243 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for COL1 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to COL1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to COL1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain COL1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of COL1 in the samples is then determined by comparing the OD of the samples to the standard curve.
