

Human SAM68 (Src associated in mitosis 68 kDa protein) ELISA Kit | SAM68 elisa kit

Human SAM68 (Src associated in mitosis 68 kDa protein) ELISA Kit

CATALOG #
AAA277170

REACTIVITY
Human

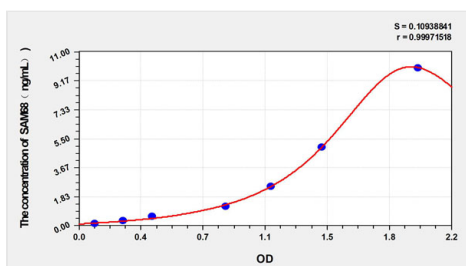

PRODUCT SYNONYMS

SAM68 (Src associated in mitosis 68 kDa protein); Human SAM68 (Src associated in mitosis 68 kDa protein) ELISA Kit; KHDRBS1; SAM68; KH domain-containing; RNA-binding; signal transduction-associated protein 1; GAP-associated tyrosine phosphoprotein p62; Src-associated in mitosis 68 kDa protein; Sam68; p21 Ras GTPase-activating protein-associated p62; p68; SAM68 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human SAM68. No significant cross-reactivity or interference between Human SAM68 and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.053 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for SAM68 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to SAM68. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to SAM68. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SAM68, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of SAM68 in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for SAM68 elisa kit
