

## Pig LH (Luteinizing Hormone) ELISA Kit | LH elisa kit

Pig LH (Luteinizing Hormone) ELISA Kit

CATALOG #  
**AAA277279**

REACTIVITY  
**Pig**

### PRODUCT SYNONYMS

LH (Luteinizing Hormone); Pig LH (Luteinizing Hormone) ELISA Kit; ICSH; Lutropin; Interstitial Cell Stimulating Hormone; LH elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                               |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Pig                                                                                                                                                                           |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Pig LH. No significant cross-reactivity or interference between Pig LH and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                      |
| Detection Range       | 1.57-100 mIU/mL                                                                                                                                                               |
| Sensitivity           | 0.61 mIU/mL                                                                                                                                                                   |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.        |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.       |

### ADDITIONAL INFORMATION

#### Related Product Information for LH elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pig LH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Pig LH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pig LH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Pig LH in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for LH elisa kit

Endocrinology; Reproductive science; Hormone metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
