

Rat GLb (Galactosidase Beta) ELISA Kit | GLb elisa kit

Rat GLb (Galactosidase Beta) ELISA Kit

CATALOG #
AAA277479

REACTIVITY
Rat

PRODUCT SYNONYMS

GLb (Galactosidase Beta); Rat GLb (Galactosidase Beta) ELISA Kit; GL-B; b-GAL; bGAL; ELNR1; EBP; GLB1; Lactase; Elastin Receptor 1; 67kDa; Elastin Receptor 1(67kD); Acid Beta-Galactosidase; GLb elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Rat GLb. No significant cross-reactivity or interference between Rat GLband analogues was observed.
Assay Type	Sandwich
Detection Range	125-8000 pg/mL
Sensitivity	54 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for GLb elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to GLb. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to GLb. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain GLb, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of GLb in the samples is then determined by comparing the OD of the samples to the standard curve.
