

Sheep IL2 (Interleukin 2) ELISA Kit | IL2 elisa kit

Sheep IL2 (Interleukin 2) ELISA Kit

CATALOG #
AAA277507

REACTIVITY
Sheep

PRODUCT SYNONYMS

IL2 (Interleukin 2); Sheep IL2 (Interleukin 2) ELISA Kit; IL-2;TCGF; Lymphokine; T-Cell Growth Factor; Aldesleukin; IL2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Specificity	This assay has high sensitivity and excellent specificity for detection of Sheep IL2. No significant cross-reactivity or interference between Sheep IL2and analogues was observed.
Assay Type	Sandwich
Detection Range	15.63-1000 pg/mL
Sensitivity	5.9 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for IL2 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to IL2. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to IL2. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain IL2, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of IL2 in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for IL2 elisa kit

Cytokine; Infection immunity

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
