

Horse ADA (Adenosine Deaminase) ELISA Kit | ADA elisa kit

Horse ADA (Adenosine Deaminase) ELISA Kit

CATALOG #
AAA277521

REACTIVITY
Horse

PRODUCT SYNONYMS

ADA (Adenosine Deaminase); Horse ADA (Adenosine Deaminase) ELISA Kit; Adenosine Aminohydrolase; ADA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Horse
Specificity	This assay has high sensitivity and excellent specificity for detection of Horse ADA. No significant cross-reactivity or interference between Horse ADA and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.069 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for ADA elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to ADA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to ADA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ADA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of ADA in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for ADA elisa kit

Enzyme & Kinase; Tumor immunity; Infection immunity

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
