

Guinea pig IgE (Immunoglobulin E) ELISA Kit | IgE elisa kit

Guinea pig IgE (Immunoglobulin E) ELISA Kit

CATALOG #
AAA277671

REACTIVITY
Guinea pig

PRODUCT SYNONYMS

IgE (Immunoglobulin E); Guinea pig IgE (Immunoglobulin E) ELISA Kit; IGHE; Immunoglobulin Heavy Constant Epsilon; Ig epsilon chain C region; IgE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Guinea pig
Specificity	This assay has high sensitivity and excellent specificity for detection of Guinea pig IgE. No significant cross-reactivity or interference between Guinea pig IgE and analogues was observed.
Assay Type	Sandwich
Detection Range	93.75-6000 ng/mL
Sensitivity	31.2 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Guinea pig IgE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Guinea pig IgE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Guinea pig IgE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Guinea pig IgE in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
