

## Chicken PCNA (Proliferating Cell Nuclear Antigen) ELISA Kit | PCNA elisa kit

Chicken PCNA (Proliferating Cell Nuclear Antigen) ELISA Kit

CATALOG #  
**AAA277920**

REACTIVITY  
**Chicken**

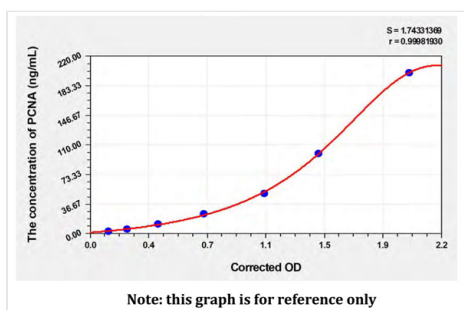

### PRODUCT SYNONYMS

PCNA (Proliferating Cell Nuclear Antigen); Chicken PCNA (Proliferating Cell Nuclear Antigen) ELISA Kit; Cyclin; PCNA elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                           |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Chicken                                                                                                                                                                                   |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Chicken PCNA. No significant cross-reactivity or interference between Chicken PCNA and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                                  |
| Detection Range       | 3.13-200 ng/mL                                                                                                                                                                            |
| Sensitivity           | 1.31 ng/mL                                                                                                                                                                                |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.                    |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |

### ADDITIONAL INFORMATION

#### Related Product Information for PCNA elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chicken PCNA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Chicken PCNA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chicken PCNA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Chicken PCNA in the samples is then determined by comparing the OD of the samples to the standard curve.
