

## Human SELE (Selectin, Endothelium) ELISA Kit | SELE elisa kit

Human SELE (Selectin, Endothelium) ELISA Kit

CATALOG #  
**AAA278023**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

SELE (Selectin; Endothelium); Human SELE (Selectin; Endothelium) ELISA Kit; CD62E; CD62-E; E-Selectin; ELAM; ELAM1; ESEL; SEL-E; E-LAM; E-LAM1; E-SEL; LECAM2; Endothelial Leukocyte Adhesion Molecule 1; CD62 Antigen-Like Family Member E; SELE elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                                                      |
|-----------------|------------------------------------------------------------------------------------------------------|
| Reactivity      | Human                                                                                                |
| Assay Type      | Sandwich                                                                                             |
| Samples         | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |
| Detection Range | 0.16-10ng/mL                                                                                         |
| Sensitivity     | 0.068ng/mL                                                                                           |

### ADDITIONAL INFORMATION

#### Related Product Information for SELE elisa kit

**Test Principle:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SELE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SELE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SELE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Human SELE in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for SELE elisa kit

Signal transduction; CD & Adhesion molecule; Tumor immunity; Infection immunity
