

## Human GAL9 (Galectin 9) ELISA Kit | GAL9 elisa kit

Human GAL9 (Galectin 9) ELISA Kit

CATALOG #  
**AAA278329**

REACTIVITY  
**Human**

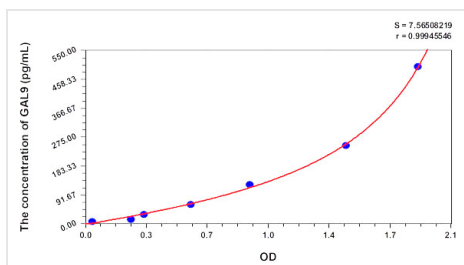

### PRODUCT SYNONYMS

GAL9 (Galectin 9); Human GAL9 (Galectin 9) ELISA Kit; LGALS9; Ecalectin; Lectin; Galactoside-Binding Soluble 9; Tumor antigen HOM-HD-21; GAL9 elisa kit

### PRODUCT SPECIFICATIONS

|                 |                                                                                                      |
|-----------------|------------------------------------------------------------------------------------------------------|
| Reactivity      | Human                                                                                                |
| Assay Type      | Sandwich                                                                                             |
| Samples         | serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |
| Detection Range | 0.16-10ng/mL                                                                                         |
| Sensitivity     | 0.053ng/mL                                                                                           |

### ADDITIONAL INFORMATION

#### Related Product Information for GAL9 elisa kit

**Test Principle:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human GAL9. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human GAL9. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human GAL9, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Human GAL9 in the samples is then determined by comparing the OD of the samples to the standard curve.
