

HA (Hyaluronic Acid) ELISA Kit | HA elisa kit

HA (Hyaluronic Acid) ELISA Kit

CATALOG #
AAA278692

PRODUCT SYNONYMS

HA (Hyaluronic Acid); HA (Hyaluronic Acid) ELISA Kit; Hyaluronan; Hyaluronate; HA elisa kit

PRODUCT SPECIFICATIONS

Assay Type	Competitive Inhibition
Samples	Serum, plasma and other biological fluids
Detection Range	15.63-1000ng/mL
Sensitivity	4.81ng/mL

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for HA elisa kit	Test Principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with HA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to HA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of HA in the samples is then determined by comparing the OD of the samples to the standard curve.
Product Categories/Family for HA elisa kit	Tumor immunity; Hepatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
