

Human p-cresol ELISA Kit | p-cresol elisa kit

Human p-cresol ELISA Kit

CATALOG #
AAA278717

REACTIVITY
Human

PRODUCT SYNONYMS

p-cresol; Human p-cresol ELISA Kit; 4-Hydroxytoluene; 4-Methylphenol; p-Cresol 98+ %; PARA-CRESOL; 4-cresol; para cresol; p-cresol elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	15.63-1000pg/mL
Sensitivity	4.8pg/mL

ADDITIONAL INFORMATION

Related Product Information for p-cresol elisa kit

Test Principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human p-cresol. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human p-cresol. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human p-cresol, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Human p-cresol in the samples is then determined by comparing the OD of the samples to the standard curve.
