Transmembrane Domain	7TM
Biological_Activity	Measured by its binding ability in a functional ELISA. Immobilized Human CCR6 at 10 ug/mL can bind Anti-CCR6 recombinant antibody. The EC50 is 44.79-56.10 ng/mL.The VLPs is negative control.
Preparation and Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20 degree C/-80 degree C. The shelf life of lyophilized form is 12 months at -20 degree C/-80 degree C. We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein indeionized sterile water to a concentration of 0.1-1.0 mg/mL. Aliquot for long-term storage at -80 degree C.Solubilize for 60 minutes at room temperature with occasional gentle mixing. Avoid vigorous shaking or vortexing. The VLPs are expressed from human 293 cells (HEK293). Mix the sample gently by repeatedly pipetting it up and down. Do not vortex.Repeated freezing and thawing is not recommended. Store the protein at -20 degree C/-80 degree C upon receiving it, and ensure to avoid repeated freezing and thawing, otherwise, it will affect the protein activity.The immunization strategy should be optimized (antigen dose, regimen and adjuvant).

Bioactivity

Activity Measured by its binding ability in a functional ELISA. Immobilized Human CCR6 at 10ug/mL can bind Anti-CCR6 recombinant antibody, the EC50 is 44.79-56.10 ng/mL. VLPs is negative control.

Application Data

is detected by Mouse anti-6*His monoclonal antibody. The two bands respectively correspond to monomer, Homodimer.
