

General TCA (Taurocholic Acid) ELISA Kit | TCA elisa kit

General TCA (Taurocholic Acid) ELISA Kit

CATALOG #
AAA28019

REACTIVITY
General

PRODUCT SYNONYMS

TCA (Taurocholic Acid); General TCA (Taurocholic Acid) ELISA Kit; Cholaic Acid; Cholytaurine; Acidum Cholatauricum; TCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of TCA. No significant cross-reactivity or interference between TCA and analogues was observed.
Assay Type	Competitive
Detection Range	4.69-300 ng/mL
Sensitivity	1.41 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)?CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)?CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for TCA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Taurocholic Acid(TCA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Taurocholic Acid(TCA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Taurocholic Acid(TCA) in the samples is then determined by comparing the OD of the samples to the standard curve.
