

Pig ADST (Androstenone) ELISA Kit | ADST elisa kit

Pig ADST (Androstenone) ELISA Kit

CATALOG #
AAA28033

REACTIVITY
Pig

PRODUCT SYNONYMS

ADST (Androstenone); Pig ADST (Androstenone) ELISA Kit; Androstenone; ADST elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Pig
Specificity	This assay has high sensitivity and excellent specificity for detection of Pig ADST. No significant cross-reactivity or interference between Pig ADST and analogues was observed.
Detection Range	31.25-2000 nmol/ml
Sensitivity	10.19nmol/ml
Intra-assay Precision	Intra-assay Precision (Precision within an assay)?CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)?CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for ADST elisa kit

Principle of the assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Androstenone(ADST) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Androstenone(ADST). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Androstenone(ADST) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for ADST elisa kit

Biochemical research

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
