

Horse PCT (Procalcitonin) ELISA Kit | PCT elisa kit

Horse PCT (Procalcitonin) ELISA Kit

CATALOG #
AAA28054

REACTIVITY
Horse

PRODUCT SYNONYMS

PCT (Procalcitonin); Horse PCT (Procalcitonin) ELISA Kit; Pro-Calcitonin; PCT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Horse
Specificity	This assay has high sensitivity and excellent specificity for detection of Horse PCT. No significant cross-reactivity or interference between Horse PCT and analogues was observed.
Assay Type	Sandwich
Detection Range	31.25-2000 pg/mL
Sensitivity	12.7 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for PCT elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to PCT. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to PCT. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain PCT, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of PCT in the samples is then determined by comparing the OD of the samples to the standard curve.
