

Human M-CSF ELISA Kit | M-CSF elisa kit

Human M-CSF ELISA Kit

CATALOG #
AAA281327

REACTIVITY
Human

PRODUCT SYNONYMS

M-CSF; Human M-CSF ELISA Kit; M-CSF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich ELISA
Samples	Cell Culture Supernatant, Serum, Plasma (EDTA, Citrate, Heparin)
Detection Range	15.6-1000 pg/mL
Sensitivity	7 pg/mL
Detection	Colorimetric
Conjugate	HRP
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for M-CSF elisa kit

Product Overview: The ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of samples in cell culture supernatant, serum, plasma (EDTA, citrate, heparin).

Intended Use: This Human M-CSF ELISA kit is intended for laboratory research use only. The stop solution changes color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human M-CSF in the sample, this Human M-CSF ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of optical density versus Human M-CSF concentration. The concentration of the samples is then determined by comparing the O.D. of the samples to the standard curve.
