ADDITIONAL INFORMATION

Related Product Information for VEGFR3 recombinant protein	Background: The protein is a tyrosine kinase receptor for vascular endothelial growth factors C and D. The protein is thought to be involved in lymphangiogenesis and maintenance of the lymphatic endothelium. Mutations in this gene cause hereditary lymphedema type IA Description: Recombinant Human VEGFR3/FLT4 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Tyr25-Ile776) of human VEGFR3/FLT4 (Accession #NP_891555.2) fused with an Fc, 6xHis tag at the C-terminus.
