IMAGES

IHC (Immunohiostchemistry)
Formalin-fixed and paraffin-embedded human skin tissue reacted with ALOX15B Antibody (C-term) ,which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

WB (Western Blot)
Western blot analysis of ALOX15B Antibody (C-term) in CEM cell line lysates (35ug/lane). ALOX15B (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-ALOX15B antibody	ALOX15B encodes a member of the lipoxygenase family of structurally related nonheme iron dioxygenases involved in the production of fatty acid hydroperoxides. The encoded protein converts arachidonic acid exclusively to 15S-hydroperoxyeicosatetraenoic acid, while metabolizing linoleic acid less effectively. This gene is located in a cluster of related genes and a pseudogene that spans approximately 100 kilobases on the short arm of chromosome 17.
