IMAGES

IHC (Immunohistochemistry)
GMNN Antibody (Center Y111) IHC analysis in formalin fixed and paraffin embedded lung tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the GMNN Antibody (Center Y111) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)
Western blot analysis of GMNN Antibody (Center Y111) in HepG2 cell line lysates (35ug/lane).GMNN (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-GMNN antibody	GMNN inhibits DNA replication by preventing the incorporation of MCM complex into prereplication complex (pre-RC). It is degraded during the mitotic phase of the cell cycle. Its destruction at the metaphase-anaphase transition permits replication in the succeeding cell cycle.
Product Categories/Family for anti-GMNN antibody	Cancer
