Preparation and Storage	Maintain refrigerated at 2-8 degree C for up to 6 months. For long term storage store at -20 degree C in small aliquots to prevent freeze-thaw cycles.

FCM/FACS (Flow Cytometry)
MAN2A1 Antibody (Center) flow cytometric analysis of 293 cells (right histogram) compared to a negative control cell (left histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

WB (Western Blot)
MAN2A1 Antibody (Center) western blot analysis in 293 cell line lysates (35ug/lane).This demonstrates the MAN2A1 antibody detected the MAN2A1 protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-MAN2A1 antibody	This gene encodes a protein which is a member of family 38 of the glycosyl hydrolases. The protein is located in the Golgi and catalyzes the final hydrolytic step in the asparagine-linked oligosaccharide (N-glycan) maturation pathway. Mutations in the mouse homolog of this gene have been shown to cause a systemic autoimmune disease similar to human systemic lupus erythematosus.
