IMAGES

IHC (Immunohiostchemistry)
NSE Antibody (Y236) immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of NSE Antibody (Y236) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)
Western blot analysis of anti-NSE Antibody (Y236) in Y79 cell line lysates (35ug/lane). NSE (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-ENO2 antibody	NSE is one of the three enolase isoenzymes found in mammals. This isoenzyme, a homodimer, is found in mature neurons and cells of neuronal origin. A switch from alpha enolase to gamma enolase occurs in neural tissue during development in rats and primates.
