IHC (Immunohiostchemistry)
HYAL1 Antibody (C-term) (AAA284969)immunohistochemistry analysis in formalin fixed and paraffin embedded human liver tissue followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of HYAL1 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)
HYAL1 Antibody (C-term) western blot analysis in HepG2 cell line lysates (35ug/lane).This demonstrates the HYAL1 antibody detected the HYAL1 protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-HYAL1 antibody	This gene encodes a lysosomal hyaluronidase. Hyaluronidases intracellularly degrade hyaluronan, one of the major glycosaminoglycans of the extracellular matrix. Hyaluronan is thought to be involved in cell proliferation, migration and differentiation. This enzyme is active at an acidic pH and is the major hyaluronidase in plasma. Mutations in this gene are associated with mucopolysaccharidosis type IX, or hyaluronidase deficiency. The gene is one of several related genes in a region of chromosome 3p21.3 associated with tumor suppression. Multiple transcript variants encoding different isoforms have been found for this gene.
