Applicable Applications for anti-CA14 antibody	FCM/FACS (Flow Cytometry), ELISA, WB (Western Blot)
Antigen Type	Synthetic Peptide
Antigen Source	HUMAN
Preparation and Storage	Maintain refrigerated at 2-8 degree C for up to 6 months. For long term storage store at -20 degree C in small aliquots to prevent freeze-thaw cycles.

WB (Western Blot)
Western blot analysis of CA14 (arrow) using rabbit polyclonal CA14 Antibody (N-term). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the CA14 gene.

FCM/FACS (Flow Cytometry)
Flow cytometric analysis of A375 cells using CA14 Antibody (N-term) (bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

WB (Western Blot)
Western blot analysis of CA14 antibody (N-term) in A375 cell line lysates (35ug/lane). CA14 (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-CA14 antibody	CA14 belongs a large family of zinc metalloenzymes that catalyze the versatile hydration of carbon dioxide. The protein is predicted to be a type I membrane protein and shares highest sequence similarity with the other transmembrane CA isoform, CA XII; however, they have different patterns of tissue-specific expression and thus may play different physiologic roles.
