IMAGES

IHC (Immunohiostchemistry)
TRIM54 Antibody (N-term) immunohistochemistry analysis in formalin fixed and paraffin embedded human skeletal muscle followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of TRIM54 Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)
TRIM54 Antibody (N-term) western blot analysis in A549 cell line lysates (35ug/lane).This demonstrates the TRIM54 antibody detected the TRIM54 protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-TRIM54 antibody	The protein encoded by this gene contains a RING finger motif and is highly similar to the ring finger proteins RNF28/MURF1 and RNF29/MURF2. In vitro studies demonstrated that this protein, RNF28, and RNF29 form heterodimers, which may be important for the regulation of titin kinase and microtubule-dependent signal pathways in striated muscles. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq].
