IMAGES

IHC (Immunohiostchemistry)
LHB Antibody (C-term) immunohistochemistry analysis in formalin fixed and paraffin embedded human testis tissue followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of LHB Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)
LHB Antibody (C-term) western blot analysis in mouse heart tissue lysates (35ug/lane).This demonstrates the LHB antibody detected the LHB protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-LHB antibody	LHB is a member of the glycoprotein hormone beta chain family and is the beta subunit of luteinizing hormone (LH). Glycoprotein hormones are heterodimers consisting of a common alpha subunit and an unique beta subunit which confers biological specificity. LH is expressed in the pituitary gland and promotes spermatogenesis and ovulation by stimulating the testes and ovaries to synthesize steroids.
